

Extrupack was legally established in 1972 by brothers Mr. Jos Winata Wihardja and Mr. Hubertus Dharma Wihardja, and commenced commercial operations in 1976. Extrupack manufactures packaging materials made of aluminium tubes. The office and factory are located in Km. 28,5 Jl. Raya Bekasi, Bekasi, Indonesia, in the island of Java. Extrupack was initially established to fulfill the packaging requirements of the local pharmaceutical industry. Initial customers were Kalbe Farma, now one of the largest local pharmaceutical company in Indonesia, and Kimia Farma, a government owned pharmaceutical company. The factory started operations with 1 (one) production line. Through continuous upgrading and expansion, the factory now operates with 11 (eleven) production lines working in three shifts.

Over the years, Extrupack has maintained its focus on high quality, technical excellence and customer oriented service. As a result, the company has expanded its customer base to include clients in the cosmetic, adhesive, stationery, and dental industries. Clients now include notable multinational companies such as L'Oreal, Bayer, Pfizer, Schering, Roche, etc. both local and overseas. Exports to the Pacific Rim account for 20% of revenues and is expected to be a major portion of revenues in the coming years.

In 2002, Extrupack obtained its ISO 9001 certificate and has regularly updated it up to the present.
